DISCLAIMER

The purpose of this White Paper is to present the Streamies project to potential coin holders and investors in connection with the proposed cryptocurrency. The information set forth below may not be exhaustive and does not imply any elements of a contractual relationship. Its sole purpose is to provide relevant and reasonable information about the project.

Nothing in this White Paper will be considered a prospectus of any kind or solicitation for investment. This document is composed exclusively with a detailed view of the project, its applications, the technology used, platforms and presentation of the team among other details considered important for future investors. This White Paper is not subject to, laws or regulations of any jurisdiction which are designed to protect investors.

Some statements, estimates and financial information contained in this White Paper involve known and unknown risks and uncertainties that may, as is known, due to the volatility of the financial system and cryptocurrencies, cause actual results to differ materially in such future projections

English is the official language of this White paper, a source of information about Streamies and platform. The information contained herein may, from time to time, be translated into other languages or used in the course of written or verbal communications with existing and potential customers, partners, etc. In the course of this translation or communication, some of the information contained here may be lost, corrupted, or misrepresented. The accuracy of those alternative communications cannot be guaranteed. In the event of any conflict or inconsistencies between these translations and communications this official Streamies English White Paper document will prevail.

GLOSSARY

FIAT

State-issued money which is neither convertible by law to any other thing, nor fixed in value in terms of any objective standard

BLOCKCHAIN

The main purpose of the blockchain is to allow fast, secure and transparent peer-to-peer transactions . It is a trusted, decentralized network that allows for the transfer of digital values such as currency and data.

STREAMER

a person who broadcasts himself online through a live stream or pre-recorded video

MASTERNODE

Masternode is simply a cryptocurrency full node or computer wallet that keeps the full copy of the blockchain in real-time, just like your have Bitcoin full nodes and is always up & running.

CAGR

Compound Annual Growth Rate

AI

Artificial intelligence

INTRODUCTION

The cryptocurrency market today comprises a multi-billion-dollar industry. That being said, it is yet to be fully accepted by the masses as an investment tool, compared to standard fiat currencies like the dollar (\$) or the euro (€). While holding a market share of approximately 1.2% in current exchange currencies, that figure is expected to see rapid growth in the upcoming years.

We, Streamies, believe in the potential of cryptocurrency, and that through its application, users may find an easy and efficient way of receiving finance for their projects. This will be achieved by utilizing what is known as an ICO or a masternode pre-sale.

Our vision at Streamies is to allow streamers and viewers to fund and advertise their activities as simply and securely as possible by utilizing digital currencies for project development and service development. Right now, we are designing and constantly upgrading a fresh new platform for our users where they can enjoy in an uncensored and decentralized environment, while at the same time inform the community and make sure everything happens in a secure and user-friendly platform, the Streamies platform.

ABOUT US AND OUR VISION

We, at Streamies, aim to restructure the existing arrangement in the business model with no middleman that exist and help the streamer and viewer to get the best out of our integrated platform.

We want to provide the benefit that streamers and viewers receive from Streamies, but without making them go through all the trouble and hassle.

How will the use of Blockchain technology be beneficial?

To achieve our vision, we will be using the blockchain technology, which is one of the most appreciated technologies in recent times.

The blockchain is a distributed ledger system that can efficiently record a transaction between two parties. We can use this technology to fulfill our vision of establishing a direct contract between the streamer and the viewer.

While blockchain will ensure a secure transaction between the parties, we will ensure the credibility of the Streamies platform and ensure that our users will not be censored. We will give our users a private and uncensored environment.

Since the contract will be entered on blockchain and the consideration will be a cryptocurrency, and since there is a proof of a valid transaction entered between the two parties.

With time, we will be able to expand to a broader audience, and we can ensure a better deal for both parties. As we believe in the power of opensource projects, we want to help this economy to operate on its own without any intervention of third parties.

STREAMIES PLATFORM

The Streamies platform is a blockchain based masternode platform that aims to help streamers and viewers. It supports both desktop and mobile devices, thereby providing users with the chance to make stable profit and enjoy more crypto-currency's benefits conveniently.

This section explains the importance of Streamies platform along with the usefulness and inventiveness of its official coin.

In the case of existing masternode coins such as DASH, MEME and others, not only maintaining a certain amount of coins on the wallet or VPS servers that can operate 24 hours stable is also very crucial

However, can be difficult to some people as they are not familiar with some software(VPS deployments, wallet updates,etc.).

One purpose of our platform is to deal with such inconveniences and let non-professional investors who wish to form a masternode take part of the Streamies platform without having to consider any of the annoying complications such as hardware or software manipulation.

UNIQUENESS OF STREAMING

Streamies is a convenient interface for managing current and future streams and contents, as well as convenient management of obtained digital assets with visualization of trends through interactive innovations that are integrated.

In 2017, the real cryptocurrency boom began: by now the aggregate amount of funds raised in this market has already exceeded \$ 8 billion. Nevertheless, there is still a shortage of solutions that would allow users to easily each other. The technological difficulties associated with the cryptocurrency launch are often far beyond the understanding of both the campaign participants and the projects that drives it.

In addition to simplicity and accessibility, Streamies offers significant advantages such as safe payments from streamers and viewers.

Together with this, Streamies creates a secure built-in decentralized platform where streamers can place their streams and content.

Data will be stored on the blockchain; this way, every time a masternode has been bought on it, it directly solves the data management issues and any possible data corruption that could occur.

The platform accepts all contents and will not censor any of the data posted. When uploading the data, authors can be kept private. Streamers manage the collected funds, viewers, and their content entirely. Everything works wholly decentralized using the P2P model.

TRUST-LESS SHOPPING

In addition to supporting the emission and movement of cryptocurrencies, Streamies also acts as an escrow like a figure of digital-assets of any type that people have added to the Streamies platform. Everyone will have to find some exchange/escrow service to exchange and buy/sell them.

Users must have a Streamies wallet to utilize the services provided by Streamies, and inevitably, acquire them.

Streamies is created to support uncensored content exchange. Any content streamed on Streamies can be viewed on Streamies using the integrated platform will ensure that every stream and piece of data is kept uncensored and that you, as a user, won't be left with a disappointment afterward.

STREAMIES CURRENCY

Streamies cryptocurrency's designed to be as a payment method on the Streamies platform. Users will be to make a direct payment for services, tip other streamers, and of course, receive payments. Another positive influence on the coin is the low block reward. With this low block rewards the price high and will positively influence the masternode owners and Streamies coin holders.

SIMPLY THE BEST

Streamies platform was designed in such a way that it can cover a wide range of purposes. All the purposes listed here above are a way to bring more crypto knowledge and user cases into the World. We have chosen for a wide combination of services, and we were able to do this thanks to our team and community. To be able to explain all the services provided by Streamies, we have made a list of them, this white paper here will explain to you step by step how our platform works and what kind of services we have combined. Therefore, when you visit the Streamies platform, you'll know that it is simply the best one out there.

ACCESSING THE PLATFORM

Streamies is a unique platform. There isn't anything like it. Where most platforms use a website to gather their community, Streamies has decided to let its users access the platform within the wallet itself, this way we take the possibility away from third parties that would like to influence our platform, third parties such as government agencies that could take it down or censor our platform and its users. We believe that not only it will stop the censoring, but make it more user-friendly as well, users that want to pay for a service will be eligible to do it from the same window and let them experience the Streamies content within no time.

STREAMIES FEATURES AND OPTIONS

STREAMERS

Streamers are entitled to multiple features and options, which will enable them to real stream time, videos, games, and many more. Due to the unique options, they will have the possibility to establish their price, chat with their viewers, create their own emotes, and, if necessary, ban unwanted behaviour of their viewers. We believe necessary that a streamer can moderate its targeting group and, by doing so, improve the experience for their audience. Each streamer can setup his title and their price, this will also positively influence their work, since they can ask the price they think their work worth and so bring even better service to the viewers. Still, never the less let them have control and avoiding centralization that is occurring on other platforms.

VIEWERS

Viewers will not be left behind, and they, too, are entitled to multiple features and options such as chatting with their favourite streamer and having an optimized search engine. They can sort the content by price, title, and category. Next to this, they can tip and donate to their streamer of choice. Having these options available will let them fully experience the content provided on the platform in an uncensored and private way of doing.

WHY STREAMIES

Streamies is an entirely anonymous project that lets its users have a rule of free experience. Due to the nature of its built, it is completely decentralized, anonymous, and temper free. For the first time, there will be a place that cannot be regulated, that has no "owner" or an approval system, users are the ones deciding what and when they want to post.

Censorship is becoming history, and Streamies is becoming the future.

COIN DETAILS

COIN SPECIFICATION

COIN NAME: STREAMIES

TICKER: STRMS

CATEGORY: PoW / POS & MASTERNODES

ALGORITHM: SKUNKHASH

MAXIMUM SUPPLY: UNLIMITED

PRE-MINE: 50.000

MASTERNODE COLLATERAL: 1.000

BLOCK TIME: 60 SECONDS

BLOCK REWARD: 65 % FOR MASTERNODES; 35 % FOR MINERS

WALLETS

EXCHANGES

PARTNERS

MASTERNODES

The most distinctive masternode feature is that anyone investing in it can acquire stable and almost guaranteed profit just by locking up his/her money in the masternode for a fixed amount of time. However, despite its attractive characteristic, hosting a masternode is entirely out of reach for most individual investors since most masternodes require substantial capital and intricate software engineering to set up.

These individuals come together to form a whole masternode, and like that, we will be able to encourage more people to participate in masternode investments as well provide them a much safer investment channel rather than investing in the exchange market without adequate acknowledgment.

Masternodes are “servers” in the crypto currencies network that relay transaction and also process other specific functions. The most distinctive characteristic of a masternode is that the users can deposit their money in a “masternode product” and earn a portion of the block rewards in the form of the cryptocurrency they invested. The yield varies primarily according to the masternode count, and each coin might have different payout periods. A masternode allows you to generate “passive income” from cryptocurrencies without having to run expensive mining equipment or having to invest in exchanges actively. To create a masternode, a user only needs to lock in a specific amount of coin. Users can then either set up a server to host the masternode or ask a service provider to do so on their behalf. To make it easier for you, we at Streamies have made several set-up guides here below, and this will help you get your masternode up and running.

MASTERNODE GUIDE

PDF Link: <https://discord.gg/nwaNpUv>

VIDEO Link: https://www.youtube.com/channel/Uck5u_AkFia2j6zZyilFGkTw

COIN BURN

Every transaction made will have a fee; these fees will be collected on a wallet that will be burned. Streamies have an unlimited supply; therefore, masternode owners and stakers will not require the fee to be paid for their services once the total amount of coins has been reached. Next to this, another positive thing will happen, and that is the currency emission will be kept stable, in the long run, this will influence the price and the rarity of Streamies cryptocurrency.

MARKET RESEARCH

The global video streaming market size was pegged at USD 38.56 billion in 2018 and is expected to register a CAGR of 18.3% from 2019 to 2026. Innovations such as block chain technology and artificial intelligence (AI) to improve video quality are expected to boost market growth. Moreover, rapid adoption of mobile phones owing to the growing popularity of social media platforms and other digital mediums for branding and marketing is anticipated to drive the market.

Growing adoption of cloud-based solutions, particularly in North America and Europe, to increase the reach of video content is positively influencing the market. Ongoing innovations and technological advancements are expected to meet growing user expectations for exceptional video quality, performance, and security.

Streamies are bound to act on the rising demand for streaming solutions and services; therefore, we have established a unique environment for their users. In this environment, censorship isn't possible, and streamers and viewers get the solutions they have been craving to perfection their possibilities and exploit their freedom. As seen on the chart here above, the demand foresees a tremendous rise.

In combination with the low block reward, we are confident that Streamies will maintain its value over time and be a reliable solution to the market and its users.

GOAL AND PURPOSE

STREAMIES GOAL

Crypto-currencies are still in the childhood phase, and blockchain technology provides a world of possibilities for practical applications that extend far beyond the financial sector. Streamies embraces this technology to open a decentralized streaming platform.

Harnessing existing technologies and concepts and by building the first integrated streaming platform that gives users the ability to post their content in an uncensored environment.

For a rough comparison that may serve useful, total world cryptocurrency market cap is at around US\$500 billion and climbing.

Leaders in the cryptocurrency field, such as William Mougayar, talking about “vanity metrics” – the breaking of records at each “Next Big” cryptocurrency launch, only seems relevant to those in the cryptocurrency industry. In this blockchain world, a big launch still confusing with as-yet-unproven success in the field. According to those who embrace cryptocurrency culture, more than nine out of ten blockchain-based start-ups are likely to go to the wall. Expectations of success from the experts are less optimistic than even for regular start-ups. We believe that, to a small extent, this is due to the dis-balance between the complexity of the technical aspects of projects and actual business use of the services that users are not able to validate within a reasonable amount of time after the launch of the cryptocurrency.

Waiting for 2 years for a technology to be developed and then to begin thinking about how other businesses can adopt that technology seems to be a challenging concept. Therefore, our goal is to launch a streaming platform in combination with a user-friendly interface which will be fully integrated to the Streamies project as immediate proof of concept.

OUR INNOVATION

We, at Streamies, plan to integrate a streaming platform and a safe stop for uncensored streaming and viewing, by eliminating the need for intermediaries and their credit processing partners, through the utilization of more advanced and affordable blockchain technology. Integrating that technology with an immediately accessible platform that will directly compete with the established market leaders. This can be achieved by creating a bridge between two already existing technologies and combine them to improve and innovate an already established business model, which is in higher demand than ever. This way, we will be left with a state-of-the-art streaming platform, which will arouse the community members.

PURPOSE IMPLEMENTATION

Our goal is to create a cryptocurrency which will be widely implemented as their key payment solution. By putting different aspects of the Streamies cryptocurrency and platform together, we will be left with a finished product that provides fast, secure and private transactions throughout the process, while being widely implemented on our platform from the beginning.

This way, we have a direct use case, and our users can directly enjoy the benefits. Another important goal is to explore the decentralization aspect truly. Not only in the way our cryptocurrency is built, but even in the services provided by us. Therefore, we have chosen to implement several features such as an innovative data-protection service and several user functionalities, this will ensure our users that they are dealing with a state-of-the-art streaming platform, that not only wants the best for its users, it is the best, it is Streamies.

ROADMAP

FIRST QUARTER 2020

STREAMIES LAUNCH
LIMITED PRE-SALE
COIN BURN
EXCHANGE LISTING

SECOND QUARTER 2020

MOBILE WALLETS RELEASE
WHITE PAPER RELEASE

THIRD QUARTER 2020

ADVERTISEMENT FOR STREAMERS
STREAMING FEATURE INTEGRATION
MOBILE STREAMING INTEGRATION

FOURTH QUARTER 2020

TO BE ANNOUNCED

UTILITY ROADMAP

YET TO BE WRITTEN....

FINANCIAL CLARIFICATION

To be able to grow as a business, you will always need financial clarification, here is ours. We have calculated the cost of building and maintaining the platform, next to this, we have estimated what is needed the systems updated as well as other aspects of it such as marketing of Streamies.

COIN DISTRIBUTION

Streamies is the core of all transactions on the platform. The first issue and distribution of Streamies coins will be during the launch, which is, in fact, a launch of Streamies opportunities and services, both that exist at the moment and any future additions. 50.000 Streamies coins will be pre-mined, which will be placed for pre-sale, bounties, marketing, and strategic partners.

BUDGET ALLOCATION

DEVELOPMENT & MAINTENANCE

Streamies team will spend most of the fund raised in developing the system and reinforcing members such as the Development Team, Production, Operation and Maintenance Team, Android/ios team, Streamies team, Test/Management/Maintenance Team, Big Data Statistics Team and the Design Team. Through this, we will ensure our platforms': - Security – Scalable design with easy maintenance - Highly reliable professional operation and maintenance team

FUNDRAISING GOALS

At the time of this writing this White Paper Streamies generated 50.000 coins as pre-mine. Of those coins 0.02% were sold either public or private. The remaining 99.98 % were and will be used to pay for costs and compensate team members, backers, and advisors. These values have been carefully selected to enable us to reach our development milestones and jumpstart the Streamies project. Streamies will follow strict procedures during all stages of fundraising, with funds used to, among other things:

GENERAL SALE

General sale happened with a total with 0.02%

OTHER FUNDS ALLOCATIONS

Total Burned : 60% <http://172.86.75.176/address/SStreamiesPremineBurnAddressXhrDdb>

Devs : 8% - 1 MN per Developer team member (4 members x1000 coins each)

Remaining : 31.98 % as per description above on Development and Maintenance

EMISSION

Streamies emission will start at premined amount of 50 000 coins of the initial supply during the first year. The newly created coins will be used for block rewards, as shown in the coin specification. Each year the block reward will deteriorate. This will help keep the emission low while maintaining a high value.

MARKETING

AUDIENCE TARGETING

Targeted audience is the most important aspect of marketing, we have chosen to not have the biggest community, but to have a very active one. A community that truly stands behind us and understands the importance of our platform.

Sometimes less is more.

The beauty of this is that our community will help us get the word out and will directly use our services to the fullest. Targeting is done by choosing the groups that are most likely to use the product, we have achieved these true different channels and our team will continue to do this.

MARKETING STRATEGY

Doing good is not only our moral imperative, but it is also, we believe, the best possible Marketing and PR strategy in our modern world.

Even though Digital Media companies including Google, Facebook, Twitter and LinkedIn have all recently forbidden marketing cryptocurrency projects we have always believed that being socially responsible was one of the best ways of promoting Streamies and raising more trust to others concerning cryptocurrencies. People in general and Millennials, in particular, are increasingly suspicious of information they receive due to the amount of censorship. People are no longer swayed by censorship on existing platforms. In particular, digital natives are likely to question a streamer's authenticity and true motives behind any censored material or catchy slogans. Rather than spending money on independently advertising and promoting Streamies, we feel that if we spent the same money on making our services simply the best, and we can create a virtuous cycle that benefits everyone involved.

SWOT ANALYSES

STRENGTH

Technology
Secure
Vision
Great team
Marketing

WEAKNESS

Start-up in the tech market
Low capital budget
Need of stronger community

OPPORTUNITIES

Cryptocurrency Markets
Crypto optimization
New partnership establishment
Wider business model establishment

THREATS

Market acceptance
Tech failures
Institutional adoption failures

MEET THE TEAM

VIPER & JOE
PROJECT OWNERS

RICK & STRAUSER
PROJECT DEVELOPERS

CUSTOMER SEGMENT

Despite the modern approach, users of the project are still people and businesses that are known to cryptocurrencies. Special favorable accounts and alternatives for leveraging their possibilities will be on offer for each segment of users. Streamies services will be available to all, but these services will be particularly useful for:

- Streamers
- Journalists
- Users who simply want to use our cryptocurrency for day-to-day needs.
- Business and private individuals who want to enjoy a private and uncensored environment.

MARKETING NEEDS

Streamies will need several marketing campaigns; they will be held on several cryptocurrencies platforms, this way, we will reach our customers and future community members faster.

Another way we will achieve a more significant community is through several bounty programs that will stimulate the community growth and the awareness of Streamies cryptocurrency and its platform. Please visit our official channels, where you can see all the ongoing marketing campaigns, bounty programs, and a lot more.

COMMUNITY SUCCESS TO DATE

The initial launch in 01-12-2020 11 p.m. CET garnered significant attention.

The Streamies community is active and growing. As of the writing of this white paper, the community comprises thousands of users:

- Facebook:
- Telegram:
- Community:
- Telegram:
- GitHub:
- Twitter:
- Facebook:

BOUNTY AND AIRDROP

Streamies have done airdrops and bounties programs before the launch of the platform focusing on various marketing activities by the community members to increase the partnerships worldwide.

CONCLUSION

Streamies is going to be the next big thing, a place where the revolution will start with his members as the backbone of the platform. A place where innovations and teamwork come together to create the next big thing and to improve yourself not only as a person but as a streamer, viewer and as a crypto enthusiast.

Join in and enjoy it!
